

CLAIMS

I Claim:

- 5 1. An article of protective clothing, said protective clothing having an identifying color that correlates to size wherein the color can be used to sort by size easily.
2. The article of claim 1, wherein said protective clothing is a boot for covering and protecting feet.
- 10 3. The article of claim 2, wherein said boot is made of a soft rubber material.
4. A boot for use with a protective clothing suit that can be easily identified by size, said boot having a size identifying visual distinction, wherein other sizes of
15 said boots have other visual distinctions.
5. The boot of claim 4, wherein said size identifying visual distinction is varying colors.
- 20 6. The boot of claim 4, wherein said size identifying visual distinction is varying patterns.
7. A method of sorting a plurality of protective coverings of varying sizes, said protective coverings having a visual distinction associated with each size, the
25 method having the following steps:
 providing a plurality of protective coverings of a plurality of sizes;
 selecting all of said protective coverings having a first said visual distinction; and

placing all of said boots of said first said visual distinction into a first location.

8. The method of claim 7, wherein said protective coverings are boots.

5

9. The method of claim 8, wherein said visual distinction is a visually distinct color.

10

10. The method of claim 8, wherein said visual distinction is a visually distinct pattern.

15

11. A method of efficiently sorting a plurality of boots comprising the steps of:
identifying a plurality of sizes of said boots by a size related color;
assigning a storage location for each of said colors;
selecting a first of said colors;
removing all of said first of said colors from said plurality of boots;
placing all of said first of said colors into said storage location assigned to
said first of said colors.
